Cut, sawn, and
locally sourced
Japanese timber
straight from the
Yatsugatake
region

With other timber
offerings also
available

SOBOKUYA

SOBOKUYA'S TIMBER

Sobokuya is an architecture and forestry company specializing in wood projects. We cut and carve our own wood for our projects, and thus have extensive knowledge about the needs and requirements of timber for architectural projects.

You can confide in our expertise to deliver high quality wood suited for your projects. The majority of our timber offerings are sourced locally in Yatsugatake, Japan.

WOOD & TIMBER

- 2022 AND 2023 COLLECTION -

OUR SELECTION
